

## **Instructions for use of tile cutting machine** **/36014/**

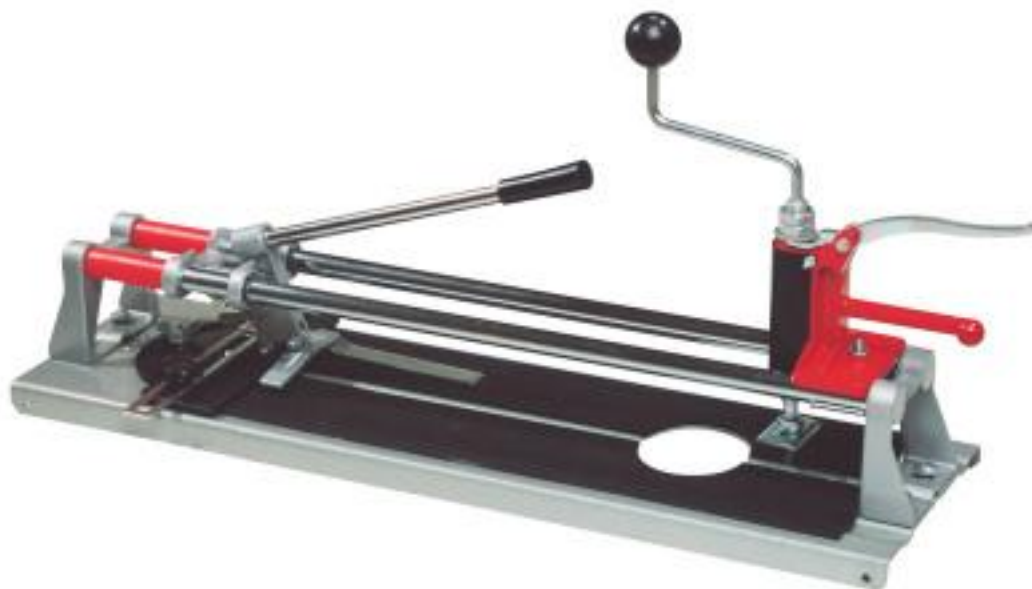

### **USE:**

Before fixing jig hole on tile cutting machine, it's necessary to assemble it as follows:

1. The handle should be screwed into the hole M 10
2. Drilling point with bits must be screwed into the thread M 8
3. Using the mounting bracket and screw M 8 is fixed assembled jigsaw to the guide rods against the base slot

### **SETTING JIGSAW BLADES (BITS):**

4. Set the bits so that the central point began drilling the first (difference blades should be about 1mm)
5. Set the desired dimension by permission the wing nut and move the plate with an edge
